Objective: To obtain a challenging position as an AI Engineer, leveraging my expertise in artificial intelligence and machine learning to drive innovation and solve complex problems.

Skills:

- **Programming Languages:** Python, R, Java, C++
- **Machine Learning:** Scikit-learn, TensorFlow, PyTorch, Keras
- **Deep Learning:** CNNs, RNNs, GANs, Transformers
- **Natural Language Processing:** NLTK, SpaCy, Gensim, BERT
- **Computer Vision:** OpenCV, Image segmentation, Object detection
- **Big Data:** Hadoop, Spark, Hive, SQL
- **Cloud Platforms:** AWS, Google Cloud, Azure
- **Version Control:** Git, GitHub

Experience:**Machine Learning Intern**

May 2024 – August 2024

AI Solutions Corp., New York, USA

- Assisted in developing a recommendation system using collaborative filtering techniques
- Conducted data preprocessing and feature engineering for various ML projects
- Participated in weekly research discussions and presented findings to senior management

Education:**BS in Computer Science (AI Specialization)**

Sep 2022 – July 2026

FAST NUCES, Islamabad, Pakistan

- Final Year Project: "Emotion Recognition using Deep Learning"
- GPA: 3.8/4.0

Certifications:

- Google Certified Professional Machine Learning Engineer
- AWS Certified Machine Learning - Specialty
- Deep Learning Specialization - Coursera (Andrew Ng)
